Blended Research Summer School

Project identification form

This document aims at identifying Blended Research Summer schools projects that could be developed within the framework of the EDUC alliance until 2026. The main goals for this activity are to:

- Favor and foster attractivity towards Research in general and research professions in particular
- Implement peer-learning activities through a research-based programme
- Allow Master and PhD students to personalize their curricula and internationalize their profile

Annex 1 specifies the framework established among the 8 universities of the alliance. Organisers are therefore encouraged to refer to it while completing the form.

Organiser information	
Name of host University	
Summer School Programme leader name	
Contact details of programme leader	
Names of local team members (known at this stage)	
Faculty / Research laboratory / Research group	
Partners within EDUC	
Information about secured EDUC partner.s university.ies (name and foreseen type of collaboration)	
Looking for partners? (if yes, please indicate: discipline, topics, teaching profile, type of collaboration)	
Summer School (SS) proposal	
Provisional title/Research topic	
Foreseen dates/period for implementation (month and year) for - Virtual part - Physical part
